

FUNDING / INVESTMENT OPPORTUNITIES FOR AEROSPACE AND DEFENSE MANUFACTURERS

SUCCESSFUL STRATEGIES FOR A CHANGING MARKETPLACE

- Are you a Michigan manufacturer active in Aerospace/Defense?
- Are you adapting to the new economic realities of the defense and aerospace industries?
- Is your strategy to: “Right-Size”, Diversify, or Pursue Merger and Acquisition?
- Do you have a need for transitional financing... financing that traditional sources avoid?

At this symposium presenters will be experts in the area of non-traditional financing. Sessions cover an overview of options when working with private equity partners. This symposium will help you determine if private equity is for you and will provide a network of resources and contacts you can call upon as needed.

Private Equity Firms with investment capability of \$285,000 to \$400 million will be present. Attendee names will be kept confidential.
